

## BRYAN MYERS

**OBJECTIVE** To provide top notch web development in a production environment.

The technology stack I'm most familiar with is:

Front End: HTML, CSS, JavaScript

Back End: PHP, MySQL

CMS: Wordpress

I am highly experienced in technology having spent the early part of my professional life doing multi-media work in sound and video and by having computers at my fingertips since I was 14 years old.

---

### SKILLS

#### WEB

Front End: HTML, CSS, JavaScript

Back End: PHP, MySQL

Frameworks & Libraries: React, SASS, jQuery

Content Management Systems: Wordpress and others.

Coding Styles: Semantic Code

#### GENERAL COMPUTING

PC and Mac

Office Software

Adobe Creative Suite: Photoshop, Premiere

Audio and Video Technologies

#### OTHER

Team Leadership and supervision

Logic and Troubleshooting

Organization

Team Player

Diplomacy and Negotiation

---

### SKILL

#### DEVELOPMENT

#### HTML & CSS (SINCE 1993)

- 2014-2024- Used HTML, CSS, SASS, Javascript, etc while working for Plantronics, Vigilant Inc and Delta Dental. While at Delta I used primarily raw code, but sometimes used one of 8 different CMSs including Wordpress, Drupal, Liferay, ModX and others.
- 2013 Coding Dojo- The Coding Dojo was a nine week, 600 hour immersive course in web computer programming. I received formal instruction on both HTML and CSS for the first two weeks of this nine week training, and then used HTML and CSS throughout the course.
- 1993 to 2014 Various- Used HTML and CSS on approximately a dozen web sites I created during this

time.

SKILL  
DEVELOPMENT  
CONT.

**JAVASCRIPT & JQUERY (SINCE 2013)**

- 2014-present- Used JavaScript and jQuery while working for Plantronics, Vigilent Inc and Delta Dental
- 2022 Coding Dojo- Took an intensive bootcamp focusing on using React to build web applications.
- 2013 Coding Dojo- For approximately two weeks during this course I received formal instruction on jQuery making such things as drop down menus, accordions, tabs, drag-able pictures etc.
- 2013 Code Academy- I completed this online course on JavaScript

**REACT & MERN (2022)**

- 2022 Coding Dojo- Took an intensive bootcamp which focused on using REACT and the MERN stack (Mongo, Express, React, Node) to build front end web applications.

**PHP, MYSQL & AJAX (2000-2013)**

- 2013 Coding Dojo- PHP and MySQL took up several weeks of this course and was arguably the most challenging. I did several projects in PHP and MySQL. Most notable were “The Wall” (mimics Facebook’s wall), “Friend Finder” (mimics picking friends from a database and adding them to a list). The Wall and Friend Finder feature user accounts and user sessions.
- 2013 Coding Dojo- Ajax training. Completed small projects using Ajax which leverages JavaScript/jQuery to get real time results from a database. I also completed a larger project called “Ajax Sorting” which mimics real time database feedback similar to Google’s search engine.
- 2000-2014 Various- PHP/Wordpress and MySQL were the muscle behind many pages I created during these years.

**MVC, RESTFUL ROUTES, CODEIGNITER & RUBY ON RAILS (2013)**

- 2013 Coding Dojo- Received formal training on MVC and RESTful architecture, and completed exercises and projects in two MVC frameworks, Code Igniter and Ruby on Rails.

**TROUBLESHOOTING AND LOGIC (1997-2013)**

- 2013 Coding Dojo- The Coding Dojo had a rule. You were not to ask for help until you spent 20 minutes trying to fix the problem yourself. Then you could ask your tablemates for help but not the teachers until an additional 20 minutes passed. This forced us to work through many problems we encountered ourselves.
- 1997-2006 Digidesign — I was the sole person responsible for investigating unverified bug reports, distilling them down to their least common denominator, and the taking part in the development cycle alongside the software and hardware engineers to see that these and other bugs were fixed.

---

WORK  
HISTORY

**DELTA DENTAL INSURANCE COMPANY SENIOR & LEAD FRONT END DEVELOPER, 7/2015-2024**

- Implemented designs into many consumer facing web properties using HTML, SASS, CSS, Javascript and JQuery. Functioned as the team lead, supervising up to 3 other developers. Helped in a consultative role to help determine the best workflow and technology solutions.

**DELTA DENTAL INSURANCE COMPANY CONTRACT POSITION, 8/2014- 7/2015 (DENTAL INSURANCE COMPANY)**

- Took design and developed semantic, 508 compliant code for the front end HTML, CSS, Javascript and JQuery for dentegrasmileclub.com

WORK  
HISTORY CONT.

**VIGILENT CONTRACT POSITION, 6/2014- 9/2014 (DATACENTER COOLING SYSTEMS)**

- Took design and developed front and back end of their customer service site in HTML, CSS, Javascript, jQuery, MySQL, PHP

**PLANTRONICS CONTRACT POSITION, 12/2013-PRESENT (HARDWARE MANUFACTURER)**

- Designed & Developed sections of the public facing website using JSP, HTML, Foundation CSS, Teamsite, ATG database, Javascript, jQuery
- Troubleshoot and fixed code written by other developers

**UNIQUE HOMES & LAND 2006-2013 (REAL ESTATE BROKERAGE)**

- Manage the business with 6-16 employees.
- Supervise the realtors
- Designed and executed marketing strategies on the web and elsewhere

**DIGIDESIGN 1997-2006 (AV PRODUCTION EQUIPMENT & SOFTWARE MANUFACTURER)**

- Technical support representative on all oversight committees for new products. This put me in a perfect position to contribute to the entire development process.

“Bryan was instrumental in developing a position in which we were able to handle customer complaints and get problems solved where we could not before. He really took the ball and ran with it. His creativity, personality and leadership will be missed here at Digidesign.”

-Bob Langlie, VP Customer Service, Digidesign

**LIVING BOOKS 1995-1997 (MULTIMEDIA CDROM COMPANY)**

- Sound Design & Sound Engineering. Recorded, edited and produced the music, dialog and sound effects for this award winning line of children’s CDROMs.

“On his own, he revolutionized our audio production process by automating simple tasks we used to do by hand. Now the entire department does in hours what we used to do in weeks.”

-Bob Marshall, Sound Designer Supervisor, Living Books

---

EDUCATION

**2013 and 2022** Coding Dojo Graduate

**1992** BA Economics, University of California, Santa Cruz

---

LEADERSHIP

- I lead a team of web developers at Delta Dental
- I learned formal workplace supervision by completing an online course with the University of London “The Manager’s Toolkit: A Practical Guide to Managing People at Work”
- I ran a small real estate corporation and kept it together during the trying times of the recession of 2008
- I was a US Coast Guard licensed master mariner and as Captain I have successfully organized crews and delivered two sailboats across the pacific from California to Hawaii.
